Iteration Test Plan

1. Introduction

- This Test Plan document is established to define the objectives, scope, and approach strategy for the functional testing process of the **Recall AI** project.
- The document serves as a standard basis for the development team, QA/Testers, and Project Manager to monitor progress and evaluate software quality.
- The test scope includes the core business flows: **UC-01** (Account Management), **UC-02** (Study Planner), **UC-03** (Focus Session), **UC-04** (AI Examiner), and **UC-05** (Dashboard). (Note: Use Cases related to the Admin actor are outside the actual development scope of the application, and are therefore excluded from this test plan).

2. Target Test Items

Below is the list of Software Items included in the test scope, focusing on functionality, performance, and security:

No.	Software Item	Test Type
1	UC-01 Account Management (Registration, Login)	Functionality, Security
2	UC-02 Study Planner (Plan & Task Management)	Functionality, Database
3	UC-03 Focus Session (Pomodoro Timer)	Functionality
4	UC-04 AI Examiner (AI Testing & Feedback)	Functionality, Interface
5	UC-05 Dashboard (Dashboard & Statistics)	Functionality, Performance

3. Environmental Needs

3.1 Hardware Requirements

Recall AI	Version: 1.0
Iteration Test Plan	Date: 07/Aug/26
Recall TestPlan	

- **Tester Workstation:** Minimum CPU of 4 cores, minimum RAM of 8GB.
- **Network:** Requires a stable broadband Internet connection to interact with AI APIs (Gemini).

3.2 Software in the Test Environment

The following base software elements are required in the test environment for this *Test Plan*.

Software Name	Purpose	Version	Type and Other Notes
Google Chrome	Primary test browser	≥ 124.0	Internet Browser
macOS / Win11 / Linux	Workstation OS	Any	Operating System
Node.js	Application runtime environment	20 LTS	Runtime Environment
PostgreSQL	System database	16	Database

3.3 Productivity and Support Tools

The following tools will be employed to support the test process for this *Test Plan*.

Tool Category or Type	Tool Brand Name	Vendor or In-house	Version
Defect Tracking	GitHub Issues	GitHub	N/A
API Testing	Postman	Postman Inc.	≥ 10.0
E2E Testing	Playwright	Microsoft	≥ 1.44
Unit Testing	Jest	Meta	≥ 29.0

4. Responsibilities, Staffing, and Training Needs

4.1 People and Roles

The table below specifies the staffing structure and specific responsibilities during the testing effort of the project:

Recall AI	Version: 1.0
Iteration Test Plan	Date: 07/Aug/26
Recall TestPlan	

Human Resources		
Role	Minimum Resources Recommended (number of full-time roles allocated)	Specific Responsibilities or Comments
Test Manager	Nguyễn Thế Quân	Provides management oversight. Responsibilities include: • planning and logistics • agree mission • identify motivators • acquire appropriate resources • present management reporting • advocate the interests of test • evaluate effectiveness of test effort
Tester	Nguyễn Minh Phát	Implements and executes the tests. Responsibilities include: • implement tests and test suites • execute test suites • log results • analyze and recover from test failures • document incidents

Recall AI	Version: 1.0
Iteration Test Plan	Date: 07/Aug/26
Recall TestPlan	

Human Resources		
Role	Minimum Resources Recommended (number of full-time roles allocated)	Specific Responsibilities or Comments
Test System Administrator	Nguyễn Thế Quân	Ensures test environment and assets are managed and maintained. Responsibilities include: • administer test management system • install and support access to, and recovery of, test environment configurations and test labs
